

Diagnostic Imaging Analyst

Join Us

Our digital health staff share our commitment to improving the healthcare system for the communities in which we live and work. Our senior recruiting and staffing team have deep roots in the Information Management/Information Technology (IM/IT) sectors, with years of education and training in this specialized field so we understand how information technology intersects with healthcare operations and management. You could apply your IM/IT skills anywhere, but on our dynamic team you help advance healthcare delivery like never before.

Due to our strong relationships with hospital chief information officers (CIOs) and key government agencies in digital health, we have placed over 2,500 professionals into a variety of temporary and permanent positions in hospitals and other healthcare organizations. Let us be your gateway to building your personal brand and career in digital health.

Duties and Responsibilities

- Monitor and help manage radiology related processes to ensure efficiency, accuracy and confidentiality
- Assist PACS Administrators and DI department leadership with obstacles
- Perform clinical workflow analysis, perform testing and training activities for DI users and clients
- Coordinate with DI-Repository agencies to ensure confidential and reliable storage, while keeping images available for authorized clinicians at other regional sites
- Control operational risk by managing stake-holder expectations and take early action to resolve problems
- Update appropriate clinical program documentation when process changes are implemented

Our Requirements

- A diploma or degree in business or healthcare administration or diagnostic imaging certification or equivalent experience
- 4 to 7+ years' of experience focused on diagnostic imaging and / or radiology information systems and / or the picture archiving communication system (PACS)
- The CIIP or PARCA certification in diagnostic imaging are strong assets, as are training or credentials in DICOM or HL7
- Training or image modality-specific certifications are considered assets, especially on X-Ray, CT Scans, MRI, Bone Density and Sonography scan technologies, etc.
- Excellent problem solving and interpersonal skills, including written and spoken communication skills
- A good overall understanding of the regional health information systems is an asset

About Us

Established in 1982, Carecor is a dominant provider of staffing services to healthcare facilities in Ontario and Nova Scotia. We provide clients with a full spectrum of healthcare workers specialized in patient care, digital health, and medical administration. In addition to celebrating our quality staff, we are proud recipients of the “Exemplary Standing” award from *Accreditation Canada*.
