

# Clinical Informatics Analyst

## Join Us

Our digital health staff share our commitment to improving the healthcare system for the communities in which we live and work. Our senior recruiting and staffing team have deep roots in the Information Management/Information Technology (IM/IT) sectors, with years of education and training in this specialized field so we understand how information technology intersects with healthcare operations and management. You could apply your IM/IT skills anywhere, but on our dynamic team you help advance healthcare delivery like never before.

Due to our strong relationships with hospital chief information officers (CIOs) and key government agencies in digital health, we have placed over 2,500 professionals into a variety of temporary and permanent positions in hospitals and other healthcare organizations. Let us be your gateway to building your personal brand and career in digital health.

## Duties and Responsibilities

- Work with clinicians at the point of care to monitor and assess the effectiveness of existing assessment/documentation methodologies, and use of EMR - HIS systems in order to develop clinical tools that are suitable for deployment. Ensure that these practices utilize the tools compatible with professional standards of practice
- Ensure the thorough documentation and requirements gathering for identified clinical services as well as help support the completion of all phases of the clinical project
- Gather, interpret, analyze, validate and document business requirements and specifications for new or enhanced functionality with project manager and/or business stakeholders
- Analyze clinical proposals clinical research to determine traceability and suitability to defined operational requirements in a clinical setting
- Liaising with the project team(s) and helping to manage appropriate decision-making bodies in accordance with healthcare standard of practice
- Perform as part of a team sharing responsibilities with peers in a fashion that adheres to clinical process and project objectives

## Our Requirements

- A diploma or degree in clinical research, medical informatics, healthcare operations, healthcare administration or equivalent experience
- 5 to 8+ years' of experience focussed on clinical operations and processes including methodologies that adhere to professional standards of practice
- The certifications that are strong assets in this area include: CPHIMS, CAHIMS, RHIA and the HCISSP that is specific to healthcare, as are training or college diplomas in Health Informatics

- Training or credentials with the most common EMR / HIS systems, is a strong asset for this role
- Excellent problem solving and interpersonal skills, including written and spoken communication skills
- A good overall understanding of the regional health information systems is an asset

## About Us

Established in 1982, Carecor is a dominant provider of staffing services to healthcare facilities in Ontario and Nova Scotia. We provide clients with a full spectrum of healthcare workers specialized in patient care, digital health, and medical administration. In addition to celebrating our quality staff, we are proud recipients of the “Exemplary Standing” award from *Accreditation Canada*.
