

Data Security and Privacy Specialist

Join Us

Our digital health staff share our commitment to improving the healthcare system for the communities in which we live and work. Our senior recruiting and staffing team have deep roots in the Information Management/Information Technology (IM/IT) sectors, with years of education and training in this specialized field so we understand how information technology intersects with healthcare operations and management. You could apply your IM/IT skills anywhere, but on our dynamic team you help advance healthcare delivery like never before.

Due to our strong relationships with hospital chief information officers (CIOs) and key government agencies in digital health, we have placed over 2,500 professionals into a variety of temporary and permanent positions in hospitals and other healthcare organizations. Let us be your gateway to building your personal brand and career in digital health.

Duties and Responsibilities

- Implement, maintain and use data security and information privacy tools such as vulnerability scanners and other security testing procedures such as penetration tests and threat risk assessments
- Support the privacy and security officer in the continued evolution and development of a comprehensive Security and Privacy Plan in keeping with corporate governance objectives and any relevant healthcare sector standards
- Lead in the continued evolution and development of requirements and execution of either in-house led or externally-led security assessments
- Review results from these security tests, identifying residual risk, make recommendations and prioritize remediation for review by stakeholders in security, privacy and IM / IT operations
- Provide an annual review of corporate security and privacy standards and policies ensuring these remain current with evolving best practices
- Work with the IM / IT operations teams to ensure that operational security controls are defined, conducted and reviewed for completeness and integrity in keeping with agreed risk strategies

Our Requirements

- A diploma or degree in computer science, IM / IT Security or Data Networking or equivalent experience
- 5 to 10+ years' of experience in healthcare or IM / IT, and 2 to 4+ of those years will include experience related to data security and information privacy
- Proven experience monitoring for security events and investigating incidents, and the ability to ensure exploitable vulnerabilities are mitigated

- The certifications that are strong assets in this area include: the CISSP or HCSSP, CRISC, CISM and CHE for data security and the CIPP or CIPM for privacy
- Excellent problem solving and interpersonal skills, including written and spoken communication skills
- A good overall understanding of the regional health information systems is an asset

About Us

Established in 1982, Carecor is a dominant provider of staffing services to healthcare facilities in Ontario and Nova Scotia. We provide clients with a full spectrum of healthcare workers specialized in patient care, digital health, and medical administration. In addition to celebrating our quality staff, we are proud recipients of the “Exemplary Standing” award from *Accreditation Canada*.
